

enabling positive actions through sustainable resource use

SUSTAINABLE DEVELOPMENT POLICY

Core Objectives:

- Development that improves the total quality of life, both now and in the future, without detriment to the environment.
- The enhancement of community and individual well-being through economic development that safeguards the environment for present and future generations.
- The protection of biological diversity and maintenance of essential ecological processes.

Guiding Principles:

- All decisions and processes should take into account both long and short-term economic, environmental and social considerations.
- The global impact of actions and policies should be considered.
- Recognition of the need to develop a strong, diversified and growing economy which enhances the capacity for environmental protection.
- An understanding that there should be community involvement on all decisions and actions.
