

Enabling positive
actions through
sustainable
resource use

New Years Waste Resolutions for your School?

Cornwall Waste Action (CWA) would like to offer you the opportunity to join our Schools Waste Auditing Programme to help you reduce waste and save money...

STEP ONE: Book your **FREE** initial appointment* with CWA to discuss your school's waste management practice, including recycling and composting and review your current waste contracts (cheaper options could be available).

STEP TWO: Book your School Waste Audit, this analytical task will take a minimum of 2 hours and the Site Manager or Caretaker will need to be involved, it will also need to occur on a normal school day (after-hours is possible, but audit must happen before waste is removed from location).

STEP THREE: Review your Waste Audit Report compiled by CWA, consider the recommendations and savings to be made and book a staff consultation meeting (to include kitchen, cleaning, teaching and student representatives) with CWA prior to the installation of improved waste management system

STEP FOUR: Installation of new waste management system by CWA, with the support of staff and practical assistance from Site Manager or Caretaker, this activity will take up to half a working day.

STEP FIVE: Follow up visits at 3 and 6 months later, to include assembly address and student involvement, to maximise school wide ownership of new waste reduction programme and assess organisational progress.

Schools should utilise this programme to position themselves as a pro-environmental organisation, through the implementation of best practice in the sustainable use of resources, CWA will assist with this action and support the school to raise its environmental profile, through the local media and other promotional activity.

The cost of your school joining the CWA Waste Auditing programme is between £350—£700** depending on the size of your establishment, however this is a short-term cost, as in the long-term you will make financial savings beyond this amount as well as improve your schools environmental performance.

* Contact CWA **NOW** for your **FREE** initial consultation meeting, this offer is limited to bookings in February only, meetings from March onwards are available at £50 per school. There is no obligation at initial meeting to continue with the programme, however you will be surprised at the financial savings available with CWA support.

** Although CWA is a charitable not for profit organisation, we are not funded to undertake this waste reduction work with schools.
